Evidence of Speculative Streets -----ival and Growing Confidence in Future.

INGTON CONFERENCES ARE DOMINANT FACTORS

With Considerable Profiting Gains in Prices Are Well Maintained.

YORK, March 14.—The stock made a striking demonstration th today during the short Sat eight today during the short Satssion, and gave convincing evidf a substantial speculative rewith growing confidence in its
mon and broadening participan the number concerned in the
ions. The market showed greater
re power than at any previous
of the week and was sharply
in that respect as the selling
profits from time to time was.
This selling was absorbed with
incres and slight influence that
incressive of the power of the
back of the market. The demflow was the more remarkable,
after the uncertain action of
ck's markets, which have given
ression of skillful fostering and
a profit taking, such as not inreside of skilling localing and a profit taking, such as not in-ily is followed by abandonment upse after all available advan-ave been aqueezed out of the

tion.

I stimulating influence on the intron clearly looked to Washing-for its origin or to the persistent its of proceedings at Washington the control of the financial district of the presence and consultation the government authorities of sevenant regarded as most responsible pentalizes of the great property beats of the country has been fold with intense interest in the financiation. The belief is that these distincts cack means to bring about and from the country and an assurance of the country and an assurance. of the country and an assurance have in the increase on the part or which would obviate the costber which would obviate the costsputes over wages which, it is
d, would be necessary in seeking
dement. Surmises over the scope
a plans being discussed in Washi broadened today to include supsteps to do away with the presigid prohibition of the Sherman
of all agreements in restraint of
to as to qualify the restriction
o allow railroad traffic agreements
such others as may be deemed
and reasonable. Reports of the
ag of these projects have been and reasonable. heroris of the or of these projects have been sed with growing excitement in tock market and were the domifactors in today's active rise, povement showed variety and conmovement showed variety and conble uniformity, although some
if which have advanced most during
mask did not share fully in the
stee. The profit-taking, which was
cause of this, was in evidence again
a the market closed and made the
slightly unsettled, but most of the
swere well maintained to the last,

## STRONG WHEAT MARKET; CLOSE AT HIGH POINT

Stampede of Shorts to Cover Is Main Cause of the Sharp Advance.

CHICAGO, March 14.—The wheat market was alrong the entire session, and toward the end of the day sestiment in the pit became very buillsh. The close was strong, with prices at the highest point. The sharp advance was due to unusually sharp buying by shorts, who were forced to cover by the congested condition of the May delivery. Several of the leading buils were active bidders for May, and this caused a atmaped among shorts, who continued active buyers right up to the close. There was little in the news to atmulate demand, although some fresh reports regarding the inroads of the green bug in the wheat fields of Oklationa were received. Demand for cash wheat was again active and had a strengthening effect upon options. Poreign influence was bearish but it was apparently totally ignored. May opened it lower to ke higher at 9450954c, advanced to 25% and closed at 964696ke.

A new high record market on May corn was reached today, when that delivery sold at 68hc. The market was strong throughout the entire session owing to vigorous demand from shorts and some of the leading buils. The close was strong throughout the entire session owing to vigorous demand from shorts and some of the leading buils. The close was strong throughout the entire session owing to vigorous demand from shorts and some of the leading buils. The close was strong throughout the lighest price. May opened it to ic higher at 64kc.

Onto were strong all day, chiefly on account of the strength of wheat and corn. The volume of trade was small May opened unchanged to it higher at 64kf 64kc.

Provisious were strong, and scored a sharp advance, owing to the buying, sail to be for leading local packers. At the close, which was aimost at the high point for the day. May pork was up 250 Tige at \$12.200 ftr. 722. May lard was 12 filled higher at \$4.50. Ribs showed a gain of 10c at \$5.50.

Stalls Were Filled, but Are Nigh Cleaned Out by Dusk.

Business was up to its standard of market row, Saturday, and despite of the fact that the stalls were exceptionall well filled in the morning, some of the dealers were almost and out before darf. There was a large demand for meat an fish, and fruits and vegetables met read sale. A new shipment of apples appeared

fish, and fruits and vegetables met ready sale. A new shipment of apples appeared, but the prices remain unchanged at 80c and 65c a peck.

Banans were offered at 25 and 50 cents a dozen, beets at 25 cents a peck, cocoanuts at 10 cents cach, lemons at 15 and 25 cents a dozen, primes at three pounds for 25 cents, and strawbergles at 25 and 30 cents a cup.

Beefsteak sold for 29 cents a pound, hamburger at 125 cents a pound, mutton chops at 15 cents, and vegi at 20 cents a pound. Salmen retailed at 20 cents a pound, perch and stucyen at 15 cents, and trout at 15 cents cach.

Clearinghouse Statement.

NEW YORK, March 14.—The statement of clearing house banks for the week shows that the banks hold \$39,665,675 more than the requirements of the 25 per cent reserve rule. This is an increase of \$529,160 in the proportionate cash reserve as compared with last week. The statement follows:

	The statement tonows:

these institutions have aggregate deposits of \$770,758,200; total cash on hand, \$53,719,900, and leans amounting to \$773,-948,900.

The Financier will say:
The statement of averages of the Associated Banks of New York for the week ending March 14 shewed decreages in all important items, but the statement of actual conditions at the close of business Saturday revealed altogether a different position. Taking the annual report in preference to that dealing with averages of the week, specie and legal tenders gained \$2,213,490—this despite previous payments by the banks to the Treasury-reflecting clearly the continued linfow of cash from New York to the interfor. Loans expanded \$2,065,760, white depositions roke \$4,058,400, due to the gain in cash and the expansion in loans.

The banks are still decreasing their creasition, the retirement for the week having been about three-quarters of a million. With the continued flow of funds from other reserve centers, and the slight changes in the loan item, the banks would be embarrassed by the accumulation of an idle surplus, but the repastion of a statement of averages employed in making up the weekly attended to the learning house shows an expansion in almost all item, to a surplus on Saturday stood at \$33,349,375. The summary of State banks and trust companies in Greater New York not reporting to the New York clearing house shows an expansion in almost all item, to an half millions. The percentage of cash reserve of the trust companies was 24.5 per cent, with an increase in the volume of speculation it is quite likely that the loans of New York will be higher from this time on.

This is all wrong—there is as much difference between Doctors as there is between other men. There is the Doctor who is in husiness purely for the money in it—there is the Doctor who practices because he loves his business—there is the young man just out of school—who is up-to-date, but inexperienced—there is the old fogy of fifty year ago who will not be elleve the world moves and who is a back number—then there is the Doctor who spreads him "back number"—then there is the Doctor who spreads himself over the whole field of medicine, and is "Jack of all
"allments" and Master of none," and finally the Up-to-date
Specialist who strives to excell in one class of troubles
only—and who studies the most approved methods of other
successful Specialists—and adds to them from his own experfence, always using the most approved up-to-date methods. Yet never satisfied until his results are PERFECT—
